

dropout®

ALL IN ONE PARTICLE REMOVER

Construction & Manufacturing

In the fuel ash plant ...

“Finally, a product that does what it claims and removes water from compressed air systems. After many years of expensive downtime and component replacements in my system I now have clean dry air.”

Jim Donnelly
Production Manager,
ScotAsh Ltd (Lafarge Tarmac and Scottish Power)

About Dropout®:

Dropout® is a leading supplier of filtration equipment into the compressed air industry. **Dropout®** offers an extremely high performance ALL IN ONE solution. **Dropout®** removes liquid water and other contaminants at a wide range of flow rates without the need for replacement filter elements. This ultra efficient “super filter” has been tested intensively achieving an amazing result of 99.9999% liquid water removal efficiency and results of 99.9% particle removal efficiency (down to 0.5 micron).

Save money, Save energy, Save time
DRY AIR GUARANTEED!
